

Recycling acknowledges Earth's resources are limited

Recycling helps the environment in several ways. It recovers valuable materials that can be used in new ways to make useful products, and it saves the energy and resources that would be used to make products from raw materials. For example, making one ton of paper from recycled stock saves up to 17 trees and uses 50% less water. A recycled six-pack of aluminum cans saves enough energy to drive a car five miles.

Curbside recycling in Santa Clara makes it easy and convenient for residents to recycle a wide variety of common household items including glass containers, aluminum and metal cans, scrap metal, plastic containers, plastic bags, newspapers, mixed paper, cardboard, Styrofoam®, used motor oil and filters, even batteries. A great new year's resolution would be to make sure all reusable and recyclable materials in your home and office are kept from the landfill.

RECOVER
